Rare texts support inquiry in the School of Medicine and the School of Health Professions

Seven MS1s and one graduate student from the School of Health Professions visited the P.I. Nixon Medical Historical Library on April 30. The visit to the library was the conclusion of a history of anatomy elective taught by Dr. Charleen M. Moore of the Department of Cellular and Structural Biology.

The course for medical students, Enrichment Elective 5022, and the graduate course, CSBL 5015, covered anatomy from ancient times to the present.

**Forty-one rare books were on display, including:**

Albinus, Bernhard Siegfried, *Tables of the Skeleton and Muscles of the Human Body*, 1749

Durer, Albert, *De Symmetria Partium in Rectis Formis Humanorum Corpororum*, 1532

Hooke, Robert, *Micrographia: Or Some Physiological Descriptions of Minute Bodies Made by Magnifying Glasses with Observations and Inquiries Thereupon*, 1667

Vesalius, Andreas, *De Humani Corporis Fabrica Libri Septem*, 1543

Eight students from the School of Medicine and the School of Health Professions visited the P.I. Nixon Medical Historical Library on April 30. The visit was the conclusion of a class covering the history of anatomy from ancient times to the present. Shown here: Kar-Wei Leung, MS1, examines an early 20th century photograph from the Edinburgh Stereoscopic Atlas of Anatomy (1906).
For more information about the collection of the Nixon Library, or to schedule a visit, contact Anne Comeaux comeaux@uthscsa.edu or Mellisa DeThorne dethorne@uthscsa.edu.
