Getting Started:

Genotyping

1) Please contact one of the Core Directors Robin J. Leach, Ph.D. (leach@uthscsa.edu) or Teresa Johnson-Pais, Ph.D. (paist@uthscsa.edu) to schedule a consultation and obtain a job quote.
2) If designing a custom GoldenGate multiplex SNP panel, the SNP list (either rs numbers, gene name or sequence) must be submitted to Illumina technical services to be scored. The core requests that clients design the final scored SNP list on their own; however, the core will assist clients if necessary.
3) In order for the core to order custom or predetermined SNP panels that are priced more than $5,000, a Statement of Work needs to be completed and signed.
4) DNA samples are submitted to the core as described in the Sample Submission Guidelines.
5) At the time of sample submission, an estimated time of project completion will be assigned.
6) Data in the appropriate electronic file format will be returned to the client, along with any unused DNA.
