Section 5.6	Virtual & Innovative Teaching and Learning (VITaL)	Revised:	May 2016
Policy 5.6.1	Mission	Responsibility:	Vice President and Chief Information Officer

MISSION

Mission

The mission of Virtual & Innovative Teaching and Learning (VITaL) is to work collaboratively with faculty, staff, and subject matter experts in support of the education mission. VITaL provides support services in the identification, implementation, promotion, use, and evaluation of virtual and innovative learning technologies and strategies that enhance pedagogy and improve student learning.

VITaL strives to leverage campus resources while minimizing unnecessary duplication when providing virtual and innovative teaching and learning technologies and strategies. VITaL participates in the Education Domain Council (see [Section 5.10.1](#), “Project Portfolio Management” in the *Handbook of Operating Procedures*) by championing and developing many of the technology advances that occur related to the education mission.
