2nd Annual
Laryngeal Videostroboscopy Hands-On Workshop
November 8-9, 2014
The University of Texas Voice Center, Medical Arts and Research Center, 8300 Floyd Curl Dr., San Antonio, TX 78229

Course Description:
The course will include both lecture and hands-on exposure to videostroboscopy. There will be seven hours of hands-on practice time in a small group setting, with direct instruction from experts in the field of laryngology. Participants will have the opportunity to learn and refine endoscopy-technique, as well as heighten their interpretation skills of videostroboscopy. Multidisciplinary treatment planning by the voice team will also be detailed.

Learning Objectives:
* Course participants will demonstrate basic endoscopic techniques for the use of rigid and flexible laryngeal endoscopy
* Participants will develop an introduction-intermediate level of skill in interpreting laryngeal stroboscopy
* Participants will increase their skills in efficiently planning a course of treatment and coordinating multidisciplinary care for common laryngeal pathologies

Needs Assessment:
SLPs may enhance the care of voice disorders through direct visualization utilizing videostroboscopy. Competency in transoral and transnasal endoscopy involves hand-over-hand guidance and is a highly sought after continuing education event. Our multidisciplinary voice center offers a unique learning opportunity with 7 hours hands-on practice and 5 hours of complementary coursework to integrate videostroboscopy into your clinical practice.

Tuition: $485, includes lunch Saturday

Schedule:
Saturday, November 8, 2014
7:30am  Registration, Department of Otolaryngology-Head and Neck Surgery, MARC CONF B
8:00am  Welcome and Course Overview
8:15am  Essentials of Videostroboscopy in the Treatment of Voice Disorders
