### TITLE: EDUCATION FOCUS

The role of the faculty member at UT Health SA is to contribute to the school's mission by advancing the science of nursing through scholarship as a team member or independent investigator, as evidenced by a program of scholarship that systematically advances, in one of the following areas: teaching, application/service/practice, and integration through rigorous inquiry that 1) is significant to the profession, 2) is creative, 3) can be documented, 4) can be replicated or elaborated, and 5) can be peer-reviewed. (“AACN, 1999, p. 3). Advancement in Track I is determined by progressive significance and impact of the scholarship, which receives national or international recognition. (All faculty members are expected to demonstrate excellence in teaching and progressive contributions in service.) Examples of evidence that might be used to support the significance and impact of the faculty member's work are listed below. These examples are illustrative only, to document significance and impact. Faculty on the non-tenure track position are expected to demonstrate excellence in at least one of the three areas of academic activity: teaching, application/service/practice. The teaching and teaching excellence will be evaluated for advancement based on performance in their specialized area of expertise. (HOP Chapter 3, Sections 3.6, Policy 3.6.1)

(1) Teaching Scholarship

This scholarly approach supports the development of educational environments that embrace diverse learning styles, and increasingly, places the focus of education on the learner (Edgerton, 1997). The scholarship of teaching is conducted through application of knowledge of the discipline or specialty area in the teaching-learning process, the development of effective teaching and evaluation methods, program development, learning outcome evaluation, and professional role modeling (adapted from AACN, 1999).

</tr>
</tbody>
</table>
### Examples:

- **Develops course materials that reflect state of the science, current research findings and application of evidence to practice**
- **Demonstrates effective classroom and online/distance education, as evidenced by student evaluations or peer evaluations**
- **Uses feedback from student and peer evaluations to refine courses, teaching strategies, and/or evaluation methods**
- **Presents innovations in teaching techniques at local conferences**

### Examples:

- **Effective teacher as evidenced by mastery of both content and method and documented by student and faculty evaluation**
- **Designed, organizes, coordinates and evaluates a course or series of lectures**
  - Active in program curriculum development and review
  - Develops and actively promotes new learning opportunities and clinical sites for students
- **Recognized as an exemplary scientist or clinician whose teaching activities can be documented as providing an outstanding role model for students.**
  - Involves students in research/scholarly activity or publication
- **Demonstrates effectiveness in the development and/or presentation of continuing education or other professional programs including invited presentations.**
  - Presents innovations in teaching techniques at local or regional conferences in nursing education
- **Is effective as a supervising professor for Doctoral Students.**
- **Participates in student guidance and counseling.**
  - Mentors students in meeting professional goals; evidence of impact on the professional careers of former students
- **Demonstrates innovation in teaching methods and production of texts or educational "software".**
- **Publishes article(s) in peer-reviewed or non-refereed journals or books in area of educational expertise (e.g., innovative teaching techniques, course development, program evaluation, etc.)**
- **Serves as teaching or curriculum consultant in the local or regional area**

### Examples:

- **Sustained and outstanding teaching performance of the examples cited for the Associate Professor level.**
  - Receives award(s) for teaching and/or mentoring
  - Leadership through design, organization, coordination, and evaluation of a course or courses (undergraduate, graduate or continuing education); administrative responsibility at the school or department level for curriculum; supervision of staff teaching within a course, department, or school.
  - Leads major initiative(s) within UT Health SA SON to plan, develop, implement, and evaluate new academic programs/curricula or major program/curricular revision
  - Provides leadership in developing and evaluating interdisciplinary educational programs featuring collaboration of UT Health SA & SON
  - Provides leadership in developing and securing funding for educational/training programs within national or international service-education partnerships, outreach programs, or collaborative
- **Sustained recognition as an exemplary scientist, teacher, or clinician whose activities can be documented as providing an outstanding role model for students.**
  - Mentors postdoctoral fellows and junior faculty members to receive extramural funding projects involving external agencies
  - Invitations as visiting professor at other institutions.
  - Leadership through design, organization, coordination, and evaluation of a course or courses (undergraduate, graduate or continuing education); administrative responsibility at the school or department level for curriculum; supervision of staff teaching within a course, department, or school.
  - Leads major initiative(s) within UT Health SA SON to plan, develop, implement, and evaluate new academic programs/curricula or major program/curricular revision
  - Provides leadership in developing and evaluating interdisciplinary educational programs featuring collaboration of UT Health SA & SON
  - Provides leadership in developing and securing funding for educational/training programs within national or international service-education partnerships, outreach programs, or collaborative
- **Publication of educational works in relevant journals.**
  - Invited to serve as visiting professor or educational or curriculum consultant to national or international organizations or educational institutions
  - Invitations as visiting professor at other institutions.
  - Invited to present in area of expertise at national or international meetings or conferences
  - Invited to serve as visiting professor or educational or curriculum consultant to national or international organizations or educational institutions
  - Invitations as visiting professor at other institutions.
  - Invited to present in area of expertise at national or international meetings or conferences
- **Responsibility for student guidance and counseling regarding program planning and general curricular activities, as well as outside of the Health Science Center.**
  - Serves on training grant review panels
  - Writes grants to develop students and faculty
  - Recognized by professional organizations for leadership in educational endeavors.
  - Contributions to teaching are being adopted or are affecting teaching programs at other institutions
**Discovery Scholarship:** The scholarship of discovery is an inquiry that produces, implements, and translates the disciplinary and professional knowledge that is at the very heart of academic pursuits (Boyer, 1990). The scholarship of discovery encompasses research, systematic investigation, and knowledge translation and implementation producing and implementing the knowledge that is the heart of all disciplines in academic life. The scholarship takes the form of primary empirical research, historical research, theory development, and testing, methodological studies (participatory research), philosophical inquiry and analysis, and projects aiming at knowledge translation, implementation, and dissemination. The scholarship increasingly is interdisciplinary and collaborative in nature, across professional groups and within nursing itself (AACN, 1999).

| **Discovery Scholarship** | These faculty demonstrate:  
- Potential excellence and significance and impact in scholarship of discovery (research). | In addition to meeting the criteria for the rank of Assistant Professor/CLINICAL these faculty demonstrate:  
- Excellence in scholarship of discovery (research), which is recognized nationally and leadership in research | In addition to meeting the criteria for the rank of Associate Professor/CLINICAL, these faculty demonstrate:  
- A sustained record of excellence in scholarship of discovery (research) which is recognized nationally/internationally and established leadership in research |
| **Highlighted Bolded Categories (HOP Chapter 3, Section 3.6, Policy 3.6.3)** | Examples:  
- Focused area of team or independent research that has the promise for obtaining future extra-mural research funding  
- Contributes to or conducts own pilot research project(s)  
- Has applied for and received intramural or extramural small grant funding  
- Authors or co-authors published scholarly work from dissertation, post-doctoral research, or related research collaborations in peer-reviewed journals  
- Authors or co-authors article(s) in non-refereed journals or book chapter(s) in area of research  
- Presents research papers/posters at local, state and/or regional conferences | Examples:  
- Demonstrates initiative, independence, and sustained activity in research  
- Publishes research findings and scholarship papers in professional journals: publications and referee journals are considered more significant  
- Presents research and scholarly findings at professional meetings  
- Invited to present research at national conferences  
- Obtains grants or other monies for research or other scholarly activities  
- Serves as a co-investigator or principal investigator on at least one extramurally funded research project.  
- Strong record of collaboration in research with colleagues  
- Serves on doctoral students' scholarship committees.  
- Serves on Health Science Center research review board committees. | Examples:  
- Is senior or responsible author of papers published in refereed professional journals or other media (books, paper, etc.)  
- Receives grants or other monies as a Principal Investigator for research  
- Invitations to participate at national and international professional or scientific meetings.  
- Invitations to preside over sessions at national and international professional or scientific institutions or organizations.  
- Recognition for excellence in research by professional or scientific institutions or organizations.  
- Serves on doctoral students' scholarship committees.  
- Serves on Health Science Center research review board committees. |
Service Scholarship: Scholarship is directly related to the clinical specialty of the faculty member and flows directly from professional activity, includes the monitoring professional staff and students, leadership roles in developing practice and the public health, the development of practice standards, and the initiation of grant proposals for the creation of delivery system models to improve access to health care (Boyer, 1990). Internal service refers to service to the institution as a means to conduct institutional business and service to the discipline as a means to maintain disciplinary associations—it supports the internal functioning of the academic profession and higher education as a whole and is tied to the premise of shared governance. External service takes many forms in which the faculty operates in context beyond the campus.

</table>
Scholarship of Integration: Scholarship of integration is making creative connectedness across disciplines which results in creating comprehensive intellectual patterns and interpretation and synthesis of knowledge thus shaping a more coherent and integrated use of knowledge that builds reciprocal relationships within a broader context of interdisciplinary partnerships with capacity to respond to multi-focal, complex human problems. (AACN, 1999; Wood et al., 1998; Hofmeyer et al., 2007; Saltmarsh et al., 2009). Integrative scholarship includes multiple interdisciplinary relationships that encompasses reciprocal research, teaching, and community engaged service/practice with organizations at the local regional, national and global levels. Impact of such reciprocal cooperation include project development and programs, publications, presentations, funding, and health policy.

Figure 1 School of Nursing PTAC Process

January 15th
Deadline for candidate to submit to Request for Promotion and/Tenure Form to Senior Manager of OFE along with a letter of intent

May 15th
Candidate provides a list of ten potential external reviewers to the Associate Dean and PTAC Chair.

July 15th
Deadline for applicant to upload a completed Promotion and/or Tenure packet to SharePoint. No access by faculty member after this point.

July 15th
Requests to external reviewers sent by Associate Dean

September 15th
External letters are due to the Associate Dean. OFE uploads external letters to SharePoint

October 15th
School PTAC submits a written summary articulating the PTAC recommendation of concurrence/non-concurrence with rationale to the Associate Dean

November 5th
Yes
Associate Dean meets with P&T applicant and delivers the PTAC recommendation

November 5th
No
Non-Concurrence Recommendation
If School of Nursing PTAC denies the candidates application, the Associate Dean in consultation with PTAC, conveys the recommendation to the faculty member to discuss outcomes and options available to faculty.

November 5th
Concurrence Recommendation
Associate Dean forwards the candidates application packet and PTAC recommendation to the School of Nursing Dean

January 25th
Dean of School makes recommendation and forwards application packet to the Vice President for Academic, Faculty and Student Affairs

March 1st
Vice President for Academic, Faculty and Student Affairs reviews the applicants packet and forwards them to the President

April 15th
President makes recommendation to the UT Board of Regent

August 31st
UT Board of Regents makes the final decision

January 5th
Applicant may request a review of PTAC recommendation of the appeal by the Dean

January 25th
Dean's recommendation of appeal with applicant's packet to be forwarded to the Vice President for Academic, Faculty and Student Affairs

February 5th
Appeal to the Deans recommendation must be in writing to the Vice President for Academic, Faculty and Student Affairs to the President. The appeal must be filed in writing within 10 business days of the receipts of the Dean’s negative recommendation

Revised: May 19, 2023
