Required Use of ERMS-Grants for Grants.gov Submissions Effective April 1, 2026

We wanted to inform you that, effective for all Grants.gov submissions due on or after April 1, 2026, the ERMS-Grants System-to-System (S2S) functionality should be used for proposal preparation and submission. The use of Cayuse for Grants.gov submissions will be discontinued as of that date. To ensure a smooth transition and timely submission, we ask that you contact your Research Administrative Services (RAS) Specialist as soon as possible to begin preparing your applications in ERMS-Grants. Once your proposal is complete, RAS will route it to the Office of Sponsored Programs (OSP) for institutional review. Please note that proposals must be received in OSP no later than three (3) business days prior to the sponsor's deadline to allow sufficient time for review and submission.

Previously created proposals in Cayuse will remain available for view and download through May 2026. Please work with your RAS contact to export and retain any files you may need.

If you have any questions regarding this transition, please contact the OSP Pre-Award Team at **preaward@uthscsa.edu** or reach out directly to your RAS Specialist. Thank you for your attention and cooperation as we implement this important system transition.
